

***Anti-GIRK3***

(Kir3.3 ; G-protein-coupled inward rectifier potassium channel-3)

Code Number : GIRK3-Rb-Af750 (rabbit, RRID : AB\_2571714)

Size : 20 µg and 50 µg / See label on vial  
(affinity-purified with antigen polypeptide)Formulation : Liquid ; 200 µg/ml in PBS with 0.05% NaN<sub>3</sub>.

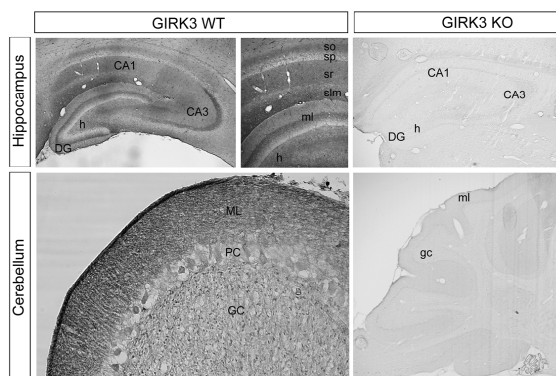

Storage : Store at 4°C. The antibody can be stored at 4°C. The antibody can be also aliquotted and stored at -80°C for long-term storage. Avoid repeated freeze-thawing. Non-hazardous. No MSDS required.

Species : rabbit, polyclonal

Antigen : mouse GIRK3 C-terminal 32 aa  
(358-389aa: DEKVEEEGAGEGAGAGD  
GADKEHNGCLPPPES; AF130860)

Specificity : mouse (others not tested)

Immunoblot detects a single band at ~45 kDa. All immunohistochemical staining disappear in GIRK3-KO cerebellum and hippocampus.

Applications : In general, affinity-purified antibody is used at around 1 microgram/ml for immunoblot and immunohistochemistry. The most appropriate concentration should be determined by users, because it depends on contents in given cells, tissues and organs.

Research Use : For research use only, not for use in diagnostic procedures.
